

## **Belmar Renter Education**

For more than a decade, Belmar has been redefining its reputation as a summer party destination to a family-friendly, four-season community that is a great place to raise a family, retire, invest or visit. As one of the Sustainable Jersey partners, Belmar Borough is leading the way to foster a community partnership and outreach project to increase the awareness of water conservation to the tens of thousands of its' annual visitors.

During the spring of 2010, the New Jersey Water Savers Program developed and distributed a water conservation door hanger to educate visitors on the importance of changing wasteful habits in the kitchen, bathroom, and laundry room. Currently, the Borough mandates that renters be provided with an informational folder about municipal services, information about code enforcement, programs, and events. These folders are distributed via local realtor offices.
