RAIN GARDEN CONCEPTUAL DESIGN
YORKSHIP ELEMENTARY SCHOOL

1251 Collings Avenue
Camden, NJ 08104

This rain garden, with a drainage area of approximately 500 square feet, will be 3 inches in depth, 155 square feet in area, and will disconnect rooftop runoff from directly discharging into the CSO system. The rain garden will be planted with native plants such as Purple Coneflower, Black-eyed Susan, and Butterfly Weed. In conjunction with the Water Resources Program's Stormwater Management in Your Schoolyard educational program, students will help plant this rain garden.
